EDUCATION

National Taiwan University

M.S. in Electrical Engineering

GPA: Overall 4.13/4.3

Taipei

Sep. 2018 - Jan. 2021

National Taiwan University

B.S. in Electrical Engineering

GPA: Overall 3.79/4.3

Taipei

Sep. 2014 - Jun. 2018

EXPERIENCES/AWARDS/PROJECTS

Coursework of CSIE5440: *Intelligent Conversational Chatbot*

Feb. 2017 - Jun. 2017

- Worked as a team of 4 to create a PTT (Taiwan version of Reddit) thread searching task-oriented bot consisting of NLU module, dialogue manager, DB, and NLG module.
- Implemented and crowd-sourced training data for NLU and NLG modules of the chatbot

4th Place at *Lawnote LegalTech Hackathon*

Sep. 2019

- Built a Chinese event graph extraction system tailored for legal documents leveraging classic NLP pipelines including SRL, NER, and coreference resolution

M.S. Student at National Taiwan University

Jan. 2021

- Proposed a novel probing method that probe the information in black-box end-to-end ASR systems through "audifying" hidden states of end-to-end ASR. Provided an intuitive way of network probing for speech processing tasks [3].
- Explored model-agnostic meta-learning methods on low-resource dependency parsing. Improved low-resource dependency parsing performance over standard multilingual pre-training baselines [2].
- Explored cross-lingual zero-shot transfer method for multilingual BERT [1].

1st Place in *Formosa Speech Recognition Challenge 2020 - Taiwanese ASR*

Jan. 2021

- Worked as a team of 2 to build a Taiwanese Southern Min (TSM) ASR system and a TSM-to-Mandarin speech-to-text translation system using Kaldi and Moses
- Ranked 1st among 12 teams in the TSM ASR track
- Ranked 1st among 8 teams in the TSM-to-Mandarin speech-to-text translation track

Speech Recognition Engineer Intern at *Taiwan AI Labs*

Jul. 2019 - Sep. 2019

- Built a TSM-to-Mandarin end-to-end speech-to-text translation system
- Crawled 1,500 hrs noisy parallel taiwanese speech and mandarin subtitles from Youtube
- Experimented with two popular end-to-end architectures: LAS (Listen, attend, and spell), RNN Transducer
